

Clean air

GREENGUARD-GOLD clean air certification for all Döllken edgebands

The GREENGUARD certification is an internationally recognised standard for low-emission products to indicate indoor air quality. In fact, more than 400 sustainability standards, norms, directives, procurement regulations and classification programmes guarantee the credibility of GREENGUARD-certified products. All Döllken edgebands are certified to the highest standard, "GREENGUARD-GOLD". This means that they are certified for use even in sensitive areas, such as preschools, primary and secondary schools and health-care facilities. Certification is annually revised and updated.
