Digital printing to perfection

Innovative plastic edgings for design

Any creative furniture manufacturer or interior architect who has opted for the DIGITAL-EDGE – digitally printed thermoplastic edging – clearly has a competitive advantage. These premium edgings facilitate sophisticated design down to the last detail and can be individually styled as a promotional surface or for creating a personal profile.

The edgebandings (made of ABS or PP) are digitally printed offline – for a rapport-free print profile in perfect colours and outstanding quality. This is also in conformity with the strict standards of the kitchen industry. DIGITAL-EDGE is supplied in thicknesses between 0.6 mm and 3.0 mm, and in widths up to 105 mm. A choice of various grades of gloss is also available from matt to premium gloss.

Networked thinking – successful engagement

Data exchange, data management and data discipline are the success factors for implementing digital business models and sales channels. A lot of operations at SURTECO are already managed digitally. We want to join forces with our trading partners and take the next steps together with them – towards improved workflow and optimized business processes. We are open to professional and extensive exchange of ideas with you. This is because future-proof networking inspires digital prowess and enhances competitiveness for all of us.

Edgings – instantly!

There's nothing magic about speed here – it's pre-programmed

For many years, the Instant Edging Programme – IEP for short – has been the hallmark of speed and perfect Design Match among the collections of leading international board manufacturers. Specially tailored to the needs of even the smallest artisan craft businesses, our IEP facilitates prompt delivery of selected edgings from the factory. The programme comprises edgings and accessories, such as hot melt adhesives, suitable for more than 10,000 boards produced by more than 50 leading international manufacturers.

Needs-based,

tailor-made, punctual

IEP empowers you to remain flexible in your routine business and keep to promised delivery deadlines without any problems. This is because matching edgings for more than 10,000 decors of leading international board manufacturers are available within 24 hours. From a length of 1 metre and in a wide range of different widths. Our cut-to-length service enables us to meet individual customers requirements in very

small batches. Even FUSION-EDGE can be supplied to you from the first roll.

All you need is Speed

We supply our paper-based TECOLINE Speed edgings from areas of 150 m² within just four working days (with HSK coating +1 day). Whether for application as soft-forming or as a straight edge, TECOLINE Speed is suitable for all standard chipboards and is absolutely ideal for our TECOFOIL Speed finish foils.

FUSION-EDGE is an innovative furniture edging which creates a jointless union between edge and board – known as a visual zero joint. This will inspire you as a furniture designer, because it opens up new perfection in styling for you. The edging is supplied from stock from an order quantity of one roll in ABS or PP from stock.

Optimum production quality

As a producer, FUSION-EDGE presents you with a genuine alternative to edge bonding because no additional hot melt adhesive is required. This benefits production reliability, increases productivity and leads to a significantly increased useful life for furniture. The FUSION EDGE is compatible with the Laser* and NIR procedure and with all HotAir machines. You can obtain our FUSION-EDGE from the first roll directly from the Instant Edging Programme.

Innovation
FUSION-EDGE

Jointless perfectly happy

*In Germany, the laser joints are protected under a patent held by kitchen-manufacturer Bulthaup. You require their agreement for use in Germany.

Edgings put the gloss on your products

SURTECO is a market leader as a specialist for high-gloss edgings and surfaces. We offer a range that provides you with trustworthy quality and defines contemporary trend benchmarks. Our edging solutions meet a very broad spectrum of aspirations and requirements – particularly for the kitchen furniture industry. The edgings are perfectly tailored to the decorative image and grade of gloss for the kitchen furniture industry.

Trend topic: PRIMEmatt

We are meeting the trend towards the PRIMEmatt look with a selection of edgings that have impressive properties when it comes to visual appearance and mechanical characteristics.

However, the highlight is the pleasant silky touch and the touch-sensitive surface. We offer you the PRIMEmatt and highgloss edgings in maximum width of 105 mm and in different strengths in ABS or PP.

COMPACT- STYLE

The award-winning design edge

The edge for design diversity received four awards at the same time, the interzum award, the reddot design award, the German Design Award and the Diament Meblarstwa. The combination of UNI colour front and COMPACT-STYLE simulates a single-coloured coating with an inlaid panel providing a natural effect. This effect significantly upgrades the furniture and the edge skilfully defines a modern design edge.

TECOSMART: the self-adhesive furniture foil

Do you want to upgrade your item of furniture or your customer's furniture, and style it with a trendy new look? TECOSMART has the appropriate solution. This self-adhesive foil was specially developed for furniture making. In next to no time, you can upgrade your furniture and give your item of furniture a new look.

One Stop Shop – everything from a single source

The product portfolio of SURTECO GmbH has the biggest bandwidth in the sector and provides complete solutions to suit your needs as a customer. We have the material, the know-how, the sense of design, the production facilities and the experience in order to achieve what is feasible. The possibilities are boundless. Decor, degree of gloss, haptic textures and colour are perfectly

harmonized to match your preferences. This enables you to be certain that your products are successful.

Our selection meets your desires

The comprehensive portfolio matches our aspiration as an innovative, competent full-range

supplier in design and technology. Thanks to the bundled expertise we are able to perfectly meet the demand for harmoniously matched decors, textures and degrees of gloss. We provide you with everything necessary for coating a chipboard or a different wood-based material. Our customers have access to bundled competence, everything from a single source and solutions in a network that is unique in our sector. These strategic measures – we call them a “One Stop Shop” – make SURTECO more agile, more flexible and virtually unrivalled.

Design at its best

Our products for furniture, flooring and doors have an impressive reputation in the sector. Apart from their haptic and optical qualities, they captivate with premium surfaces, anti-fingerprint effects and particularly robust resilience. Countless tactile and visual impressions are possible: from metallic and duogloss effects with mattgloss interplay, refinements from supermatt to glossy, haptic touch synchronous with the decor, or a warm impression are just a few examples from our competence spectrum.
